

Limitation of free speech is fundamentally against our country's traditions and constitution.

To do so because the NAB doesn't like the competition is even worse.

Limiting XM from giving traffic and weather is like limiting [www.weather.com](http://www.weather.com) from giving forecasts. My city doesn't currently receive traffic and weather from XM, but I certainly hope to receive it in the future. I write you because I do not want my freedom of choice to be limited because of others who want to force out the competition.

If the NAB want me to listen to their stations, then let them change their format to one that appeals to me.
